EASY MEASURING

Multiple Scales on One Cup

PRECISE MEASURING

Consistent Mix Ratios Every Time

CONVENIENT

Cup Sizes for Every Project

1:1 AND 2:1 SCALES

Customized for Woodworkers & Artists

EcoPoxy® Graduated Mixing Cups have been designed with our users in mind and are customized for woodworkers and artists. They include easy-to-read scales and clearly labeled ratio guides with both metric and U.S. customary units. Achieve consistent results with correct mix ratios every time.

Our mixing cups are available in four different sizes: 300 mL, 750 mL, 2 L, and 4 L. The smaller sizes are great for mixing UVPoxy®, while the larger sizes are perfectly suited for FlowCast® SPR. Made with high-quality materials, our mixing cups can be cleaned and used over and over again.

With our ever-growing line of EcoPoxy accessories, we can support you with everything you need for your epoxy projects.
